PROBLEM STATEMENT

Time is, and always will be crucial part of our life and

waiting for our meal is indeed a time waste .

When we guys go to our favourite restaurants to enjoy

the delicious meal and waiting for hours ruins our mood.

Also sometimes it takes a lot of time in arrival of food

PROPOSED SOLUTION

We at lazez-e-website brings you the facility to place an order in the restaurant on the prior hand before leaving from your home and when you will reach restaurants, ordered dish will be served to you within no time. We have developed a website regarding the same . Go and check for quick serving of food at your favourite restaurants

UNIQUE SELLING POINTS

1.

It reduces the waiting time for food.

2.

Book your seat before you leave for the restaurant.

3.

You can also order food before leaving your home / office and get tasty serving meal ready while you reach.

Collaboration

Restaurants can also collaborate with us such customer can be provided with all they rquire

Deals

Customers are provided with amazing deals and offers .

YOUR TECH STACK

1.

HTML

It stands for HyperText Markup Language. It provides the structure to the webpage.

2.

CSS

CSS is used to give a cool design to our webpage and indeed our website.

3.

JAVA SCRIPT

.JavaScript is the programming language for the Web.Java Script can update and change both HTML and CSS .
